A NOTE FROM OUR TEAM

A close look at where the market stands heading into 2026.

As spring takes hold across the Lowcountry, we take stock of what the first quarter of 2026 has revealed across the neighborhoods we know and love — from the live oaks of Sea Pines to the riverfront streets of Bluffton's Old Town. Inside this report you'll find Q1 2026 sales data for the communities most asked about by our buyers and sellers, drawn directly from the Resides Hilton Head MLS.

Each page holds five numbers we believe matter most: how many homes traded hands, how long they sat before doing so, what buyers paid per square foot, the average sale price, and how closely those sales tracked their original list prices. Read together, they tell you whether a community is heating up, cooling off, or holding steady — and where opportunity may be hiding.

> Real estate, at its core, is local. National headlines rarely tell the truth about your specific street, your specific community, your specific home. This report is our attempt to bring that truth closer to home.
